## SYNOPSIS

It is the 22nd Century. After bringing irreversible destruction to our planet's habitable environment in their relentless plunder of resources, the Earth's leading mega-conglomerates lead humanity into space to colonise the night skies and forge a new future, leaving behind the barren Earth as a ruined, radioactive wasteland, with humankind seemingly destined never to return. For the past fifty years the colonies living amongst the planets of our solar system have been at peace.

But now, out of the ashes of the scorched Earth a new evil emerges, threatening to engulf the entire free solar system into a terrible darkness. Now, never before has the fate of all humankind lain in the hands of so few- a small clutch of brave mercantile militia soldiers, and their sophisticated interplanetary fighting machines, stationed at a military garrison outpost orbiting the planet Jupiter and its moons. Pitted against impossible odds, they must fight... for the future. But they will soon unwittingly and devastatingly discover that, in space, the blackest darkness is in the hearts of men.

Countless fighter craft explode, battleships are ripped apart, moons shatter, love is lost and found, and whole atmospheres ignite in huge planet-sized fireballs in this exciting new, big-budget, CG-heavy, sci-fi epic, the movie FUTURE FIGHTERS, which features never-before-imagined non-stop zero-g action stretching from the serene azure Neptune-filled skies of the exotic, geyser-filled moon Triton, to the heights of the colossal Olympus Mons on Mars, through the volcanic, hellish landscape of Jupiter's Io and icy depths of the subterranean oceans on Europa, crashing through the rings of Saturn and methane rain and lakes of its moon Titan, and down into the ubiquitous, ravaging Giant Red Eye storm of Jupiter itself!

Helmed by acclaimed international animation director Nelson Shin of the original "The Transformers The Movie" and an award-winning team of producers from Hong Kong, this 3D live-action sci-fi extravaganza FUTURE FIGHTERS features fantastic out-of-this-world robotic action and a global cast and crew from Hollywood, China and Japan whose credits include "Blood: The Last Vampire", "Cutie Honey", "Devil May Cry", "The Forbidden Kingdom", "G.I. Joe", "Red Cliff", "Star Wars", "True Legend", and many, many more. Together with creative input from Hollywood powerhouse Weta Workshop ("Avatar", "District 9", "Lord of the Rings") and belief-defying, fully-choreographed action sequences and high-wire work from Hollywood/China action director/fight choreographer DEE DEE KU ("Fearless", "Kill Bill" 1&2, "Matrix" 2&3, "Warlords") applied in entirely original, innovative ways, FUTURE FIGHTERS utilizes the virtual camera concept to the extreme, to create incredible, literally out-of-this-world excitement and never-before-seen spectacular set-pieces. Through leading the Asia film industry into the exhilarating new arena of high-definition 3D cinema, FUTURE FIGHTERS aims to raise the bar for all live-action science fiction movies throughout the cinematic world to an entirely new, stratospheric level and become a genre-defining mecha masterpiece for many years to come.

As the ancient Chinese war general Sun Tzu wrote: *"In time of war prepare for peace, in time of peace prepare for war."* There's no future for any of us if we don't.
